Hero's Journey

Journey Template

nplate to plan how your lesson will follow a hero's journey.

3rd Grade Math - Measurement

Do we add 12 + 12 + 12 or use feet first then convert to inches?

Students may get stuck trying to keep track of how many inches or feet. Students start to come up with answers and check with their peers.

Are we measuring width, length, or both? Inches or feet? Is there a better tool?

We discuss different strategies that were used in solving the problem.

Give students a ruler and ask them to measure the rug in our classroom.
